 AND PRODUCTS, 1943 - 45.

CASH RECEIPTS FROM LIVESTOCK AND PRODUCTS COMPARED
 WITH CROPS IN THE SOUTH CENTRAL REGION, 1924 - 44.

CASH RECEIPTS FROM FARM MARKETINGS,
 1945 AS PERCENTAGE OF 1944

U. S. DEPARTMENT OF AGRICULTURE

NEG. 45729

BUREAU OF AGRICULTURAL ECONOMICS

States showing significant increases in total cash receipts from farm marketings in 1945 as compared with 1944 were well distributed over the United States. Increased income from one or more of the following commodities was largely responsible for the gains in these States: poultry, eggs, cattle, calves, tobacco, truck crops, and potatoes. In eight States, 1945 receipts were less than in 1944.

APRIL 1946

- 2 -

F A R M I N C O M E S I T U A T I O N

Approved by the Outlook and Situation Board, May 17, 1946

Preliminary Estimates for the First Half of 1946

Cash receipts from farm marketings during the first 6 months of 1946 are expected to be about 3 percent lower than a year earlier. Both crops and livestock share in the decline. A light 1945 cotton crop and smaller marketings of Burley tobacco at lower prices account for most of the decline in cash receipts from crops; while a drop in the production of milk, resulting from a smaller number of dairy cows, is the principal cause of the decline in the livestock group.

Probable Receipts for May and June

Total receipts in May are expected to show an advance of about 7 percent over April. This will be due to an increase in cash receipts from livestock and products of about 10 percent, more than offsetting an anticipated small decrease in receipts from crops. The gain in livestock will come principally from sharp seasonal advances in receipts from dairy products.

Total cash receipts for June are expected to be from 5 to 10 percent above May. Receipts from livestock and products probably will advance only slightly above May as a result of small seasonal gains in meat animals and dairy products. Receipts from crops, however, are expected to rise sharply. Contributing to this rise will be increased marketings of wheat and corn in response to bonuses and higher prices and seasonal increases in receipts from vegetables and fruits.

Preliminary Estimates for March and April

Cash receipts from farm marketings in March are now estimated at 1,321 million dollars. This preliminary estimate is 5 percent below the shorter month of February and also 5 percent below a year earlier. Receipts from livestock and products amounted to 834 million dollars, a 3 percent decline from February, due in part to a considerable decrease in hog marketings. Receipts from crops dropped to 487 million dollars, 6 percent below February, with cotton and tobacco declining seasonally. Compared with March 1945, total cash receipts this March were 5 percent lower; livestock and products, 4 percent; crops, 6 percent.

Current data as to prices and marketings indicate that cash receipts in April were about 1,300 million dollars, nearly the same as in March. Receipts from livestock and products rose slightly as prices averaged a little higher and sales of dairy products and poultry and eggs increased seasonally. Crop marketings declined seasonally.

State and Regional Estimates for February

Total cash receipts from farm marketings for the United States in February were pushed 2 percent above February 1945 by a 9 percent increase in receipts from livestock and products. Receipts from crops declined 6

CASH RECEIPTS FROM FARM MARKETINGS, BY REGIONS, 1945-46 COMPARED WITH 1940-44 AVERAGE

DOLLARS
(MILLIONS)

percent. Practically all the gain in total cash receipts occurred in the West North Central Region, where the increase amounted to 30 percent. The Western Region rose slightly, but all other regions showed declines ranging up to 19 percent in the South Central Region. Cash receipts from crops ranged from 28 percent below 1945 in the South Central Region to 33 percent above last year in the West North Central Region. Cash receipts from livestock and products in February were lowest compared with last year in the South Atlantic Region, where they were down 16 percent, and highest in the West North Central Region, where they were up 30 percent.

In the first 2 months of 1946, total cash receipts from farm marketings were at about the same level as last year. Receipts from crops were 3 percent lower, but those from livestock and products were 2 percent higher. A substantial increase in the West North Central Region and a moderate increase in the Western Region made up for significant decreases in all other regions in total cash receipts. Receipts from crops were lowest in relation to last year in the North Atlantic Region, where they dropped 18 percent, and highest in the West North Central Region, where they gained 40 percent. Changes in receipts from livestock and products ranged from 8 percent below the first 2 months last year in the South Atlantic Region to 13 percent above in the Western Region.

North Atlantic Region

Cash receipts from both crops and livestock in February declined 9 percent from the same month in 1945. Although receipts from tobacco made a substantial gain, those from apples, potatoes, and all major livestock commodities dropped noticeably.

For the first 2 months of 1946, total cash receipts declined 10 percent, with apples, potatoes, milk, and hogs accounting for a large part of the decline. Receipts from crops alone dropped 18 percent, but those for livestock dropped only 5 percent.

East North Central Region

Total cash receipts from farm marketings in February declined 2 percent below last year. Among crops, increases in receipts from corn and oats more than offset decreases in those from soybeans, apples, and potatoes for a net gain for all crops of 4 percent. Wholesale milk, cattle, and egg receipts largely accounted for a decline of 3 percent in the total for livestock and products, despite a sharp gain made by hogs.

During the first 2 months, total receipts declined 4 percent from the same period last year, largely because of smaller receipts from cattle and wholesale milk. Increases for oats, wheat, and corn accounted for most of a 5 percent gain in crop receipts, but this was more than offset by the 7 percent decline in receipts from livestock and products.

West North Central Region

Cash receipts from farm marketings in February were 31 percent above the same month in 1945, representing an increase of 33 percent in crop receipts and 30 percent in livestock and products. Hogs, wheat, cattle, and corn were responsible for most of the gain.

U. S. Cash Receipts	1,223,823	1,185,576	1,698,773	1,732,232	2,922,596	2,917,808

During January and February, cash receipts increased 18 percent over the same two months last year, largely because of increases for hogs, wheat, corn, and oats.

South Atlantic Region

Total cash receipts in February declined 12 percent from last year. Cash receipts from crops declined 9 percent, with vegetables, apples, peanuts, and cotton showing substantial decreases. Broilers and hogs caused most of the 16 percent decrease in receipts for livestock and products.

A decline of 13 percent was registered by cash receipts from farm marketings during the first two months compared with the corresponding months in 1945. Crop receipts decreased 16 percent, as those from cotton, tobacco, truck crops, and apples dropped sharply. Livestock and product receipts declined 8 percent, with hogs and broilers showing the greatest decreases.

South Central Region

Cash receipts from farm marketings in February declined 19 percent from February 1945, with some decrease in most items and sharp drops in receipts from tobacco and cotton. Crop receipts dropped 28 percent, while those from livestock and products decreased only 4 percent.

During the first two months, total cash receipts from farm marketings showed a decrease of 13 percent largely because of declines in tobacco, cotton, cattle, calves, hogs, and milk.

Western Region

Although livestock and products rose 15 percent in February compared with last year, a decline of 6 percent in crops brought the gain in total cash receipt down to 4 percent. Receipts from meat animals and wheat made substantial gains, but those from vegetables and cotton declined.

Total cash receipts during the first two months increased 5 percent. Income from crops was about the same as in 1945 as the rather sharp increases in receipts from wheat and fruits were about offset by declines in income from vegetables and cotton. Livestock and products showed a gain of 13 percent, with turkeys, cattle, and wholesale milk making the greatest gains.

Total Cash Receipts from Farm Marketings Show Increase in 1944 and 1945

Revised estimates now place total cash receipts from farm marketings in 1945 at 20,781 million dollars, slightly higher than the preliminary total of 20,710 million dollars estimated a month ago. The new total combines revisions for livestock and products, here published for the first time, with the revised crop estimates presented in the February Farm Income Situation. Receipts from crops in 1945 are estimated at 9,056 million dollars instead of the cumulative monthly total of 9,489 million dollars as published in February; and receipts from livestock and products are 11,725 million dollars compared with the earlier estimate of 11,221 million dollars. The following table presents the revised estimates by commodity groups compared with the estimates published in February.

Commodity group	Revised	Previous
	estimates	estimates
	Million	Million
	dollars	dollars
Farm marketings	20,781	20,710
Livestock and products ...:	11,725	11,221
Meat animals	5,826	5,361
Dairy products	3,070	3,082
Poultry and eggs	2,597	2,577
Other	232	201
Crops	9,056	9,489
Food grains	1,313	1,392
Feed crops	1,370	1,341
Cotton (lint and seed) .:	1,034	1,249
Oil-bearing crops	^{1/} 579	675
Tobacco	954	940
Vegetables	1,642	1,734
Fruits and tree nuts ...:	^{1/} 1,449	1,476
Other	715	682

A 9 percent increase in receipts from meat animals was the only significant change in the revised livestock estimates. This increase was caused mainly by revisions in the estimates for hog slaughter. The downward revision of 5 percent in cash receipts from crops resulted largely from changes in estimates for cotton, oil-bearing crops, and vegetables.

The table below shows the revised estimates by commodity groups for 1943, 1944 and 1945. Total cash receipts from farm marketings as well as income from crops increased in 1944 and again in 1945. Receipts from livestock and products fell in 1944 but rose in 1945 to a higher level than in 1943.

Commodity group	1943	1944	1945
	Million dollars	Million dollars	Million dollars
Farm marketings	19,342	20,238	20,781
Livestock and products ...:	11,360	11,199	11,725
Meat animals	5,865	5,720	5,826
Dairy products	2,809	2,949	3,070
Poultry and eggs	2,447	2,306	2,597
Other	239	224	232
Crops	7,982	9,039	9,056
Food grains	961	1,328	1,313
Feed crops	1,122	1,194	1,370
Cotton (lint and seed) .:	1,314	1,497	1,034
Oil-bearing crops ^{1/} ...:	654	591	579
Tobacco	541	689	954
Vegetables	1,579	1,567	1,642
Fruits and nuts ^{1/}	1,222	1,501	1,449
Other	589	672	715

^{1/} Tung nuts, which were classified as tree nuts in the revisions appearing in the February issue, are included here with oil-bearing crops.

Total cash receipts increased 5 percent from 1943 to 1944. Crop receipts rose 13 percent, while those from livestock remained about the same. Declines in meat animals, poultry and eggs in 1944 were nearly offset by an increase in dairy products. Sales of hogs in 1944 were slightly greater than in 1943, but prices declined 5 percent and cash receipts dropped about 4 percent. The quantity of sheep and lambs marketed in 1944 was 8 percent below 1943, and average prices were 4 percent lower.

Receipts from wheat rose 42 percent in 1944 as marketings increased 33 percent and prices gained 7 percent. This change in cash receipts from wheat accounted for most of the increase of 38 percent in food grains. Receipts from fruits and nuts showed a gain of 23 percent in 1944 over 1943. Receipts from apples increased 28 percent, with quantities sold gaining 17 percent and prices advancing 9 percent. Receipts from oranges and grapefruit increased 26 percent, with quantities marketed up 15 percent and prices up 10 percent. Receipts from cotton lint showed a gain of 41 percent, as sales increased 56 percent and prices were down 10 percent.

In 1945, total cash receipts from farm marketings rose about 3 percent above 1944, largely because of increased receipts from livestock and products. The greatest gain took place in receipts from poultry and eggs, although meat animals and dairy products also increased. Sales of eggs dropped 6 percent, but prices were up 16 percent. Quantities of chickens sold were about the same in both years, but prices were 8 percent higher in 1945 than in 1944. Sales of broilers in 1945 were up 34 percent above the year before, and prices gained 3 percent, resulting in an increase of 37 percent in cash receipts.

Sales and prices of cattle and calves increased 11 percent each in 1945 over 1944, so that total receipts gained about 24 percent. Marketings of hogs were down 24 percent in 1945; thus, in spite of a gain in prices of 8 percent, total receipts declined 19 percent. Sales of sheep and lambs were about the same in 1945 as in the year before, but prices were up 5 percent and cash receipts showed a corresponding increase.

The increase of 4 percent in 1945 cash receipts from dairy products was due to quantity rather than price. The quantity of milk sold at wholesale increased about 8 percent, butter gained 4 percent, but butterfat sold as cream dropped 5 percent.

Although cash receipts from crops in 1945 were almost the same as in 1944 receipts from some crops varied between the two years significantly.

While average prices of cotton rose 11 percent in 1945, sales dropped 36 percent resulting in a decline of 29 percent in cash receipts. The gain in receipts from feed crops resulted mainly from increases for corn and oats. Marketings of corn last year were 31 percent greater than the year before, prices were 3 percent lower, and receipts were 27 percent higher. Sales of oats in 1945 were up 35 percent compared with 1944, and, with prices down 10 percent, receipts rose about one-fifth. Marketings of tobacco in the calendar year 1945 rose one-third over 1944, prices increased 4 percent, and cash receipts gained 38 percent.

The decline in receipts from fruits and nuts last year was largely a result of the small 1945 apple crop. Sales of apples dropped 27 percent in 1945, prices rose 17 percent, and receipts declined 14 percent.

1/ Includes also ducks, geese, guineas, pigeons, quail, and pheasants.
 2/ Horses, mules, honey, beeswax, and bees.

Cash Receipts from Livestock and Products Compared with Crops
in the South Central Region, 1924-44

Cash receipts from livestock and products as a percentage of total income from farm marketings rose much more sharply between 1924 and 1944 in the South Central Region than in any other region in the country. By the end of this period, they had doubled in importance as a source of farm income in that region. Starting in 1924 with 21 percent of the total, cash receipts from livestock and products rose to 46 in 1943 and dropped back to 42 percent in 1944.

Meat animals increased from 10 percent of total cash receipts in 1924 to 25 percent in 1943, and declined to 22 percent in 1944. The gain made by hogs was very pronounced, from 3 percent in 1924 to 8 percent in 1944. The relative importance of cattle and calves also rose sharply over most of the period; starting at 7 percent in 1924, they increased to 16 percent in 1939 and 1940 and receded to 13 percent in 1944. Dairy products contributed substantially to the sharp increase in importance of livestock and products, particularly in the early part of the period, rising from 4 percent of total receipts in 1924 to 12 percent in 1931 and maintaining a level of 9 to 10 percent for the remainder of the period. Poultry and eggs increased from 5 percent of the total in 1924 to 9 percent in 1930, receded to 6 percent in 1933-34, and then rose again to 10 percent in 1943 and 9 percent in 1944.

Cotton was mainly responsible for the decrease in relative importance of crops, dropping from 59 percent of all receipts from farm marketings in 1924 to 30 percent in 1944. The importance of oil-bearing crops increased about seven times, and vegetables about two-thirds, over the 20-year period, but these crops constitute only a small part of total crops in this region.

CASH RECEIPTS FROM FARM MARKETINGS OF CROPS AND LIVESTOCK AND LIVESTOCK PRODUCTS: ACTUAL AND AS PERCENTAGE OF TOTAL RECEIPTS, SOUTH CENTRAL REGION, 1924-44
